

VOCATIONAL TRAINING

Human expertise for your industrial investments

AIMS

Courses adapted to your requirements

You have acquired an automated ultrasonic cleaning machine and you wish to:

- Learn how to use and manage your cleaning line
- Update your expertise at regular intervals
- Teach new staff how to use the machine
- Learn more about specific subjects

METHODS

A professional environment especially for you that meets your expectations

Our training organization welcomes many trainees every year and offers you:

- 250m² of laboratories, allocated to our 4 main types of machine and dedicated to process and maintenance
- A training room for robotics
- The necessary equipment to carry out practical exercises
- A team of expert instructors from the different technical departments in our group, who are capable of running courses in an international language context (French, English, Spanish, German, Italian etc).

The costs of our courses can be entirely incorporated within your vocational training budget.

OUR FIELDS OF EXPERTISE

The syllabus is taught by specialist trainers for each type of installation.

In that way in addition to each customer's own configuration it covers four principle topics:

- Robot programming
- Machine automation
- Maintenance management
- Process management

ORGANIZATION OF A TRAINING COURSE

COURSE PREPARATION

- Analysis of the needs and resources of the future trainees is carried out and a specific quote is sent along with the traineeship contract and the training plan.
- After having signed the contract, you will receive an invitation that tells you:
 - The place, time and dates of the course
 - The name of your course leader
 - Practical information such as a map and details about accommodation

WHO IS CONCERNED?

→ Anyone who uses a FISA installation : user, supervisor, manager.

These courses are aimed at all levels of qualification and don't require any specific prerequisites. They are custom-made and flexible enough to adapt to the trainee's level of expertise.

AN ACTIVE SESSION

- The hours, that can be adjusted to suit you, are spread over one or more days
- Personalized course materials are given to you when you arrive
- An instructor will take care of you for the whole duration of the course
- Office space is allocated to you, in order to make the program as dense and productive as possible
- The number of trainees is restricted in order to encourage each trainee to participate.

AT THE END OF THE COURSE

- The trainees complete a survey so that we can ensure that the course is relevant and also confirm that all your objectives have been met.
- A certificate of attendance is given to each trainee.

OUR COMMITMENT TO QUALITY

Our services as well as your level of satisfaction show our desire to share our expertise with every trainee, in order to accelerate the profitability of your investment.

"The training course was both practical and theoretical."

Mr Jaques R. technicien de maintenance - F-77 Marne La Vallée

"Essential for enabling newcomers to grasp how to use the equipment"

Mlle Béatrice L. responsable laboratoire - F-78 Mantes La Jolie
